

RICHARD R. LESTER

EDUCATION:

1994. B.S., Physics, Massachusetts Institute of Technology, Cambridge, MA. Courses in Physics and Mathematics include: Mechanics I and II, Electricity and Magnetism I and II, Vibrations and Waves, Quantum Physics I and II, Statistical Physics, Astronomy, Astrophysics, Single and Multivariable Calculus, Differential Equations, Linear Algebra, and Functions of a Complex Variable.

PROFESSIONAL EXPERIENCE:

2004–Present. Senior Scientist, Cambridge Environmental Inc., Cambridge, MA.

2000-Present. Director of Operations, Cambridge Environmental Inc., Cambridge, MA.

1996-2004. Associate Scientist, Cambridge Environmental Inc., Cambridge, MA.

1994-1996. Staff Scientist, Cambridge Environmental Inc., Cambridge, MA.

1992-1994. Research Assistant, Massachusetts Institute of Technology, Cambridge, MA. Developed C-based software to perform relative and absolute photometry on a set of CCD images of M31. Worked under Professor Walter Lewin in the Center for Space Research. Co-authored the publication "Extension of the Magnier et al. 1992 Catalogue of Objects in the Field of M31" published in *Astronomy and Astrophysics* in early 1994.

1991-1992. Research Assistant, Massachusetts Institute of Technology, Cambridge, MA. Studied the entrainment process in clouds under Professor Earle Williams. Studied downdrafts and air currents in cross sections of laboratory scale clouds produced by an ultrasonic humidifier.

PROFESSIONAL ASSOCIATIONS:

Licensed Site Professional Association
Society for Risk Analysis NE Chapter

SELECTED PROJECT EXPERIENCE:

- Conducted numerous Method 2 and Method 3 risk characterizations for contaminated sites in Massachusetts that fall within the Massachusetts Contingency Plan. Conducted numerous evaluations of petroleum contamination at disposal sites.

- Developed multi-pathway risk assessments for contaminant emissions from combustion sources including hazardous waste incinerators, municipal waste incinerators, and cement kilns.
- Assisted in the development of probabilistic risk assessments using the risk assessment reforms under consideration in the U.S. Congress.
- Measured and modeled electromagnetic fields associated with electric power transmission lines at several existing and proposed utility projects in the Northeast. Documented current regulatory guidance on electromagnetic fields. Participated in public meetings to discuss the electromagnetic field analyses.
- Developed pollution prevention plans for aluminum mills, biotechnology firms, and metal working facilities. Worked with these industries to identify sources of waste and to make process changes to reduce or eliminate the waste.
- Participated in the evaluation of risks and hazards associated with a hot-mix asphalt production plant.
- Developed software to estimate the firm yield of surface water reservoir systems in Massachusetts from meteorological data, stream flow rates, and reservoir characteristics. Developed documentation for the software and trained personnel at the Massachusetts Department of Environmental Protection in using the software.
